

Take the next step in your career as a CPD professional.

Earn your CHCP credential and showcase your knowledge and skills to your peers, employer, and the industry.

The CHCP credential validates professionalism in the CPD community, and demonstrates commitment to advancing both the profession and your career.

As of the March 2018 testing window, the CHCP exam includes:

- Updated content focused on adult and interprofessional learning principles; educational activity planning, development, implementation, and evaluation; program leadership administration and management; and knowledge of the CPD/CME/CE environment.
- Content fully mapped to the Alliance National Learning Competencies to ensure the knowledge and skills evaluated in the exam align with the competencies you need to perform your job.

Earning the CHCP credential demonstrates that you have the skills needed to develop and advance continuing healthcare education for healthcare practitioners.
